

FAWAD SHAH

Senior Flutter Developer | Mobile App Developer (Android & iOS)

Sharjah, United Arab Emirates • Available for Remote or On-Site • fawadshah2117@gmail.com

linkedin.com/in/fawad-shah-824931183 • github.com/phawadshah2

PROFESSIONAL SUMMARY

Senior Flutter developer with 5+ years of proven experience as a mobile app developer with a focus on Flutter development, and strong proficiency in the Dart programming language. Develops and maintains mobile applications using the Flutter framework for both Android and iOS, writing clean, efficient, and maintainable code. Experienced with RESTful APIs and third-party integration, mobile UI/UX best practices and design principles, and version control systems including Git. Collaborates with cross-functional teams to define, design, and ship new features, identifies and troubleshoots issues to implement effective solutions, and optimizes application performance to ensure a smooth user experience. Works effectively both independently and as part of a team in fast-paced environments, applies automated testing and continuous integration, and stays up to date with emerging technologies and trends in mobile development. Excellent problem-solving and communication skills, with multiple applications released to the Apple App Store and Google Play Store.

TECHNICAL SKILLS

Flutter & Mobile Development: Flutter framework (Expert), Flutter SDK, Android and iOS mobile application development, cross-platform development, mobile app lifecycle, Material Design, Cupertino

Programming Languages: Dart (Expert — strong proficiency), Python (Basic), SQL (Basic)

Mobile UI/UX: Mobile UI/UX best practices and design principles, responsive and adaptive layouts, accessibility, animations (Rive, Lottie, explicit animations), Figma design handoff, pixel-accurate implementation

State Management: Provider, setState, BLoC, Cubit, GetX, Riverpod, Dart Streams, reactive programming

Architecture & Design Principles: Clean Architecture, MVVM, MVC, Repository Pattern, Dependency Injection, SOLID, OOP, design patterns, scalable modular structure, reusable component libraries

RESTful APIs & Third-Party Integration: RESTful APIs, JSON parsing and serialization, HTTP/Dio clients, OAuth 2.0, Swagger/OpenAPI, Google Maps SDK, Stripe, Apple Pay, Google Pay, Tabby, Tamara, Google/Apple/Facebook Sign-In

Native & Platform Integration: Platform Channels (MethodChannel, EventChannel) bridging Dart with native Android and iOS layers, native SDK integration, permissions, deep linking, push notifications

Firebase & Backend: Firestore, Authentication, Cloud Messaging (FCM), Cloud Functions, Crashlytics, Analytics, Realtime Database, local data storage (flutter_secure_storage, SharedPreferences)

Automated Testing & Continuous Integration: Unit testing, widget testing (flutter_test), mocking, GitHub Actions CI/CD pipelines, automated build and release, App Store and Google Play deployment

Performance Optimization: Flutter DevTools profiling, startup and memory optimization, image caching, lazy loading, widget rebuild reduction, frame-rate and jank analysis

Version Control & Tools: Git, GitHub, branching and pull-request workflows, code review, Xcode, Android Studio, VS Code, Postman, Figma, Jira, Slack

Methodologies: Agile/Scrum, sprint planning, estimation, cross-functional collaboration, pair programming, mentoring, independent ownership in fast-paced environments

PROFESSIONAL EXPERIENCE

Senior Flutter Developer | Star Gallery Mart — Sharjah, UAE | May 2024 – Present

- Develop and maintain a cross-platform e-commerce mobile application using the Flutter framework for Android and iOS, serving 20K+ active users and released on both the Apple App Store and Google Play Store.
- Write clean, efficient, and maintainable code applying MVVM, Clean Architecture principles, dependency injection, and the Repository Pattern, keeping the codebase scalable as feature scope grows.
- Collaborate with cross-functional teams — product managers, UI/UX designers, and backend engineers — to define, design, and ship 12+ new features, applying mobile UI/UX best practices and design principles throughout.
- Integrate RESTful APIs and third-party integrations including Google Maps, Stripe, Apple Pay, Google Pay, Tabby, and Tamara, with robust JSON parsing and secure local data storage.
- Identify and troubleshoot issues across Android and iOS using Flutter DevTools and Firebase Crashlytics, implementing effective solutions and resolving defects before they reach production.
- Optimize application performance to ensure a smooth user experience — 35% faster app startup and 25% lower memory usage — through profiling, image caching, and lazy loading.

- Apply automated testing and continuous integration: unit and widget tests with `flutter_test`, and automated build, signing, and release pipelines using GitHub Actions.
- Implement native integration via Platform Channels to bridge Dart with native Android and iOS capabilities where platform-specific behaviour is required.

Flutter Developer | Tritech Solutions — Peshawar, Pakistan | *Jan 2022 – Mar 2024*

- Developed and maintained 3 end-to-end mobile applications using the Flutter framework for e-commerce and health-tech clients, owning each from requirements through Android and iOS release.
- Applied Clean Architecture, MVVM, and the Repository Pattern to write clean, maintainable code, reducing new-developer onboarding time by 50%.
- Integrated RESTful APIs and third-party integrations including the Google Maps SDK and social sign-in with Google, Apple, and Facebook, plus Firebase services (Firestore, Authentication, Cloud Messaging, Crashlytics, Analytics) and serverless Cloud Functions.
- Worked independently and as part of a distributed team in a fast-paced client environment, communicating directly with stakeholders to translate requirements into shipped features.
- Used Provider as the primary state management solution, with BLoC/Cubit applied in selected modules, and added unit tests around repositories and use cases.
- Mentored 2 junior developers through pair programming and code review within an Agile/Scrum team.

Junior Flutter Developer | AppSpot — Peshawar, Pakistan | *Feb 2021 – Nov 2021*

- Built and maintained Flutter mobile applications for Android and iOS, contributing to 5 product releases across consumer and enterprise products.
- Refactored a production application from `setState` to `GetX`, simplifying state flow and reducing widget rebuild complexity for measurably better runtime performance.
- Developed reusable custom widgets and a shared component library aligned to mobile UI/UX best practices, accelerating feature development by 30%.
- Collaborated in cross-functional teams using Git for version control, Jira for sprint planning, and Slack for day-to-day communication.

KEY PROJECTS

Star Gallery Mart — Cross-Platform E-Commerce App (Android & iOS, UAE) | 20K+ active users

Tech: Flutter, Dart, GetX, MVVM, RESTful APIs, Platform Channels, Apple Pay, Google Pay, Tabby, Tamara, flutter_secure_storage, GitHub Actions

- Owned architecture and delivery end to end; implemented secure payment and checkout flows and achieved 35% faster startup through performance optimization.
- Live on the Apple App Store and Google Play Store.

GreenWendEnergy — Solar System Monitoring App

Tech: Flutter, Dart, Provider, Firebase, Firestore, Realtime Database, Google Maps, Charts, Local Notifications

- Built real-time charts and monthly reports for monitoring solar energy systems, with live data synchronization and efficient parsing of streaming backend data.
- Live on the Apple App Store.

Store Management App — Bookkeeping & Sales Tracking

Tech: Flutter, Dart, GetX, Firebase Cloud Messaging (FCM), RESTful APIs, Clean Architecture

- Implemented push notifications and sales tracking on a Clean Architecture foundation with unit-tested business logic.
- Live on the Apple App Store.

OPEN SOURCE & CONTINUOUS LEARNING

- Maintain personal GitHub repositories showcasing Flutter expertise at github.com/phawadshah2 — covering Flutter architecture patterns, state management approaches, and reusable component libraries.
- Stay up to date with emerging technologies and trends in mobile development, tracking Flutter and Dart releases, new Google frameworks, and the wider open-source Flutter ecosystem.

EDUCATION

Bachelor of Science in Computer Systems Engineering | 2017 – 2021

University of Engineering & Technology, Peshawar, Pakistan
